Louvain-la-Neuve, November 6th, 2019

Dear Sir/Madam,

Our faculty would is keen to join the Agrinatura network. Our faculty includes more than 1300 students and is the largest faculty of agronomic sciences and life sciences in the French speaking part of Belgium.

Our bachelor, master and doctoral studies cover a variety of disciplines from forestry to microbiology to environmental sciences, agriculture and food. We have long been engaged in an interdisciplinary vision of education and research with the ambition of contributing to the transition of food systems towards more sustainable models according to Sustainable Development Goals..

We are members of the ICA, IROICA and IAAS networks and we were among the founding members of Agrinatura. We would be very happy and honored to join this network again.

We are at your disposal for further information.

Yours sincerely,

  
Yvan Larondelle
